

GEOLOGIC PROCESSES

RESHAPE EARTH'S SURFACE

TWO-DAY WORKSHOP FOR 5TH-GRADE TEACHERS

Sponsored by the Utah Seismic Safety Commission, Utah Geological Survey, University of Utah Seismograph Stations, and Office of Emergency Services

ONLY \$40.00!

**1 Hour Inservice Credit
April 22 & April 29, 2006
8:30 a.m. – 4:00 p.m.
Salt Lake City**

Join us for an exciting two-day workshop that will take place in the field and in the classroom investigating and observing effects of earthquakes, volcanoes, uplift, erosion, and deposition on the Earth's surface.

Schedule

Day 1 Field trip will explore landforms along the Wasatch Front

Day 2 Classroom activities will address Utah's 5th-grade science core curriculum benchmark, "The Earth's Surface is Constantly Changing"

Materials provided

- ▶ Teaching manual with over 20 classroom activities.
- ▶ Landform and earthquake/volcano maps of the world and of Utah.
- ▶ Classroom-ready materials.

Meet at the Department of Natural Resources, 1594 W. North Temple, Salt Lake City

Field trip: be prepared for short walks and the weather.
Bring bags and camera if you want to collect rock samples and take photos.

Registration due by March 10, 2006
